ISO basicLatin alphabet Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp to Qq Rr Ss Tt Uu Vv Ww XX YY Zz VTE or O or is the fifteenth letter in the ISO Latin alphabet basic and fourth letter voice in modern english alphabet. Its name in English is O (pronounced / E OE /), plural OES. [1] History late Renaissance or early Baroque design of O, from 1627 Its graphic form has remained fairly constant since the Phoenicians until today. The name of the letter was ¿eyn Phoenician, meaning "eye", and indeed its origin form simply as a drawing of a human eye (perhaps inspired by the corresponding Egyptian hieroglyph, see writing proto-Sinaitic). Its value was the original sound of a consonant, probably [E], the sound is represented by the letter Arabic cognate A A Azayn icing. The use of this letter for a Phoenician voice sound is due to early Greek alphabets, which have adopted the letter O as "Omicron" to represent the voice / or /. The letter was adopted with this value in the old Italic alphabets, including early Latin alphabet. In greek, a variant form later came to distinguish this sound long (Omega, which means "small or"). Omicron Greek gave rise to corresponding Cyrillic letter O and letter in official catalogs start rune. even alphabets that are not derived from the Semitic tend to have similar shapes to represent this sound; for example, the creators of script Afaka and Ol Chiki, each invented in different parts of the world, in the last century, is attributed to their voice 'O' the shape of the mouth when making this sound.
